DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 9, 10, 15, 16, 17, 21-28, 30-36, 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Chawla et al., U.S. Patent # 5,726,603.

Figs. 1 and 2 of Chawla et al. discloses a circuit comprising: in Fig. 1, amplifiers 29, 30, 32 can be read as multi stage power amplifier; in Fig. 2, transistors Q1, Q2 can be read as a first power amplifier stage wherein transistor Q1 in amplifier 30 of Fig1 can be read as a first switching device, transistor Q1 in amplifier 32 of Fig1 can be read as a second switching device; inductance in T5 of the first stage can be read as an inductance coupled to the first switching device and inductance in T5 of the second stage can be read as an inductance coupled to the second switching device; feedback paths through resistors R7, R8 can be read as a feedback path.

Regarding claim 10, transistors Q1, Q2 in amplifier 30 of Fig1 can be read as first and second switching devices, transistors Q1, Q2 in amplifier 32 of Fig1 can be read as third and fourth switching devices, feedback paths through resistors R7, R8 can be read as a feedback path.

Art Unit: 2817

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, 10, 13, 14, 17, 23, 30, 36, 39, 40 are rejected under 35

U.S.C. 102(e) as being anticipated by Dupuis et al., U.S. Patent # 6,727,754 B2.

Figs. 12 and 34 of Dupuis et al. discloses a circuit comprising: in Fig. 12, transistors M6, M5 and M2, M1 can be read as multi stage power amplifier wherein transistors M6, M5 can be read as a first power amplifier stage wherein transistor M6 can be read as a first switching device, transistors M2 can be read as a second switching device; inductance L3 can be read as an inductance coupled to the first switching device and inductance L1 can be read as an inductance coupled to the second switching device; in Fig. 34, feedback path from 3414 back to amplifier 3410 can be read as a feedback path.

Regarding claim 10, transistors M6, M5 of Fig12 can be read as first and second switching devices, transistors M2, M1 can be read as third and fourth switching devices, feedback path from 3414 back to amplifier 3410 in Fig. 34 can be read as a feedback path.

Allowable Subject Matter

Claims 2-5, 7, 11, 12, 18, 19, 20, 29, and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,630,861 B2 and # 6,118,989 contain some limitations of the claimed invention.
